Black Mountain Software Scholarship Winner Announced

Polson, Montana – May 15, 2012 - Black Mountain Software has announced that Kevin Peel from Troy High School has been selected as the 2012 winner of the company's \$500 higher education scholarship. Black Mountain awards the annual scholarship to a graduating Montana high school senior who will be attending an accredited institution of higher education, regardless of their field of study. This includes trade schools, technical schools, colleges or universities. The scholarship application requires the applicant to answer the following essay question: What role (if any) should technology play in the education of yourself, your siblings, or in the future, your own children?

Donna Hislop, Black Mountain's Business Manager and head of the scholarship award committee, commented, "Of the 170 applicants for this scholarship, Kevin wrote an exceptional essay and will no doubt have a very successful future. Black Mountain Software is pleased to be able to support continuing education through our annual scholarship."

Mr. Peel is currently out of the country studying at the EF International Language School in Costa Rica, but will be returning to Montana in time to participate in his graduation ceremony on May 27. For more information on the Black Mountain Software scholarship for graduating Montana high school seniors, students are encouraged to ask their high school counselor or contact Donna Hislop at donnah@blackmountainsoftware.com.
