Black Mountain Software Scholarship Winner Announced

Polson, Montana – June 2014 - Black Mountain Software has announced that Kyla Binfet from West Yellowstone High School has been selected as the 2014 winner of the company's \$500 higher education scholarship. Black Mountain awards the annual scholarship to a graduating Montana high school senior who will be attending an accredited institution of higher education, regardless of their field of study. This includes trade schools, technical schools, colleges or universities. The scholarship application requires the applicant to answer the following essay question: What role (if any) should technology play in the education of yourself, your siblings, or in the future, your own children?

Donna Hislop, Black Mountain's Business Manager and head of the scholarship award committee, commented, "The other judges and I agreed that [Kyla's essay](#) really stood out among the 260 applications we received. It was honestly one of the most eloquent and thoughtful essays we have had the pleasure of reading in the 11-year history of our scholarship program."

Black Mountain Software is pleased to be able to support continuing education for young Montanans through the company's annual scholarship. For more information on the Black Mountain Software scholarship for graduating Montana high school seniors, students are encouraged to ask their high school counselor or contact Donna Hislop at dannah@blackmountainsoftware.com.
